## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 13-18, drawn to fabricating an interconnect system having an integrated circuit, classified in class 29, subclass 852.
  - II. Claims 33-35, drawn to fabricating an interconnect system having an integrated circuit dice, classified in class 438, subclass 107.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group I and of Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions having different modes of operation such as Group I is used as a printed circuit board to transmit signals, while Group II is used as a processing unit for a computer to process and analyze data.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
